FORM 10
TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT
STATE PROFILE FOR FY 2011
[SEC. 506(A)(1)]
STATE: GU

1. State MCH Administration:
(max 2500 characters)

The Bureau of Family Health and Nursing Services, Division of Public Health, administers the Guam Title V Maternal and Child Health (MCH) and Children with Special Health Care Needs (CSHCN) as an integrated program. The Chief Public Health Officer oversees the Division of Public Health and the Director heads the Department of Public Health and Social Services. The position of the Director is a cabinet-level position within the Governor's Office. The MCH/CSHCN Program operates as a single organizational unit and serves as both the local and state agency. This single state agency administers Title V funds and is responsible for both MCH and CSHCN services.

b. Infants < 1 year old	1,433
c. Children 1 to 22 years old	5,826
d. CSHCN	596
e. Others	11,418

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:
(max 2500 characters)

Title V Programs deliver Direct Health Care Services defined as Basic Health Services. These services generally defined as a "one-to-one", between a health professional and a patient in an office, clinic or community health center. The Basic services include what most consider to ordinary medical care, inpatient and outpatient services, allied health services, laboratory services, x-ray services, dental care and pharmaceutical products and services. The Title V Program supports services such as prenatal care, child health, women's health, immunization and family planning.

b. Population-Based Services:
(max 2500 characters)

Population-based services are intended for and available to the entire population, not only for a selected group of individuals. Health promotion, disease prevention and outreach come under this heading. Oral health, injury prevention, nutrition and public education are topics that also belong in this category. Women and children are a good example of population-based services because they can receive care in both the public and private sectors, whether or not if they have insurance or not. There is a great need for population-based services to meet their needs of reducing adolescent morbidity and mortality results.

c. Infrastructure Building Services:
(max 2500 characters)

The infrastructure-building services define services that directed the improvement and the maintenance of the health status of a population. These services include the development and maintenance of the health systems, standards and guidelines, training, data and planning. The infrastructure arena consists of the needs assessments, evaluation, policy development, quality assurance, information systems, and applied research. There is a need for the continued and expanded collaboration for families of Children with Special Health Care Needs.

3. Section Number: Form11_State Performance Measure #1

Field Name: SM1

Row Name:

Column Name:

Year: 2007

Field Note:

The data for 2006 and 2007 births has not been keyed into the Vital Statistics data files. The 2006 birth year has only had 36% of records keyed, and 2007 has not been started. The primary reason is a continuing lack of staff support for data entry, as well as a continuing lack of staff for the Office of Vital Statistics. In addition to the 40% vacancy rate the Office has had since 1999, they were given additional duties in January 2007 with no provisions made for additional funding or staff. These additional duties (marriage license applications) take up the time that had been used in the past for keying of data. During 2008, for short and sporadic periods, the Office has been able to garner some assistance from student helpers, but this assistance has not been consistent enough to complete the keying of data. The Registrar has requested the use of Community Work Experience Program (CWEP) participants since 2006, but has been told that the program is unable to place any participants in her office, due to a funding shortage in the program. The Registrar has requested clerical assistance from other programs in the Division of Public Health, but these requests have not been responded to.

LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: GU FY: 2011

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. To reduce the percent of pregnant women who received no prenatal care
2. Proportion of low-income women who reproductive health/family planning services.
3. To decrease the percentage of women who use alcohol, tobacco and other drugs during pregnancy.
4. To reduce the incidence of maltreatment of children younger than 18 years of age.
5. The prevalence of intimate partner violence in adolescent relationships
6. The percent of Guam high school students who have engaged in sexual intercourse.
7. The percent of Guam high school students who are overweight.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

By 2010, reduce pregnancies among adolescent females to no more than 46 pregnancies per 1,000.

DATA SOURCES AND DATA ISSUES

YRBS

SIGNIFICANCE

Adolescent pregnancy is one of the most pressing and persistent problems facing society. Pregnancy in adolescence may be associated with inadequate prenatal care, higher rates of low birth weight and infant mortality and repeat pregnancies during the teen years. Children born to an adolescent mother are more likely to encounter additional health risks compared with children born to non-teenage mothers. In addition, teen parenthood is associated with poverty, high costs of health care and public assistance and low educational attainment.

PERFORMANCE MEASURE:	The percent of high school students who are overweight
STATUS:	Active
GOAL	To increase the percentage of adolescents making healthy nutritional and lifestyle choices and to reduce morbidity associated with body image issues
DEFINITION	<p>The percent of high school students who are overweight</p> <p>Numerator: Number of high school youth that respond affirmatively to being overweight</p> <p>Denominator: Number of high school youth that respond to being overweight</p> <p>Units: 100 Text: Percent</p>
HEALTHY PEOPLE 2010 OBJECTIVE	By 2010, reduce the proportion of children aged 6 to 11 and youth aged 12 to 19 who are overweight or obese to 5%.
DATA SOURCES AND DATA ISSUES	YRBS
SIGNIFICANCE	Dramatic increases in childhood overweight have occurred in the recent decades. Pediatric overweight has a profound effect on physical, mental, emotional and social development of children. Furthermore, childhood overweight is associated with developing into adult overweight. Overweight youth have an estimated 70-80% chance of becoming obese adults.

PERFORMANCE MEASURE:	Percent of Children with Special Health Care Needs (CSHCN) who have age appropriate completed immunizations
STATUS:	Active
GOAL	To assure that all CSHCN have age appropriate completed immunisations
DEFINITION	<p>Percent of Children with Special Health Care Needs (CSHCN) who have age appropriate completed immunisations</p> <p>Numerator: Number of CSHCN who have age appropriate completed immunisations</p> <p>Denominator: Total number of CSHCN in the CSHCN Registry</p> <p>Units: 100 Text: Percent</p>
HEALTHY PEOPLE 2010 OBJECTIVE	
DATA SOURCES AND DATA ISSUES	Guam CSHCN Registry
SIGNIFICANCE	Infectious disease remain impoprtant causes of preventable illness in the U.S. despite significant reductions in incidence in the past years.

SO(Reporting Year) # 1

OUTCOME MEASURE:

The fetal death rate per 1,000 live births.

STATUS:

The SCHIP benefits became available to Guam in 1998. This program allows States and territories to choose from three different options when creating a plan to cover under-served children. These are: establishing a new children's health insurance program, expanding current Medicaid programs, or a combination of both strategies. Currently, Guam is using its allotment to expand Medicaid eligibility.

Information for HSCI was obtained from Medicaid form HCFA 416 the Annual EPSDT Participation Report. Based on the data provided, it seem that most individuals enrolled are receiving some periodic screening. However, the consistency and quality of the screening and the thoroughness of referrals, follow-up and treatment are areas of concern. A number of programs (MCH, WIC, Early Intervention, etc.) work to assure that all infants, including those on Medicaid receive comprehensive screening and referrals.

The data presented is from the Guam Department of Public Health & Social Services, Division of Public Welfare, State Office on Public Welfare, Bureau of Health Care Financing Office.
Due to the Office of Vital Statistics not able to input data from the Birth Certification since 2006, we are not able to obtain the data for low birth rate of infants under the Medicaid. Guam Memorial Hospital (GMHA) does not collect that certain data. GMHA did a unofficial report of 59 infants were <2,500 grams but not data if they under if the mother was under Medicaid Program, also the mother needs to enroll infant usually after birth with an official birth certificate and Social Security Number.

Form Level Notes for Form 20

Most of the data were obtained from the GMHA, DPHSS OVS, DPW/OHS, GPD, and DPHSS:STD/HIV/AIDS programs. So some data for this reporting year of 2009 is Final or Provisional according to their HSI.

HEALTH STATUS INDICATOR MEASURE # 01A

The percent of live births weighing less than 2,500 grams.

Field Note:

The Community Health Centers are using Health Pro data to measure first trimester entry into prenatal care. In 2006, 11.6% of pregnant women received care in the first trimester of their pregnancy; this is down from 13.5% and 14.8% for the years 2004 and 2005 respectively. Women from the Federated States of Micronesia had an entry rate of 9.2% for 2005 and 10.2 in 2006. The Community Health Centers anticipates that because of a part-time OB/GYN physician working additional hours there will be a gradual increase in the percent of women.

HEALTH STATUS INDICATOR MEASURE # 01B

The data for 2006 and 2007 births has not been keyed into the Vital Statistics data files. The 2006 birth year has only had 36% of records keyed, and 2007 has not been started. The primary reason is a continuing lack of staff support for data entry, as well as a continuing lack of staff for the Office of Vital Statistics. In addition to the 40% vacancy rate the Office has had since 1999, they were given additional duties in January 2007 with no provisions made for additional funding or staff. These additional duties (marriage license applications) take up the time that had been used in the past for keying of data. During 2008, for short and sporadic periods, the Office has been able to garner some assistance from student helpers, but this assistance has not been consistent enough to complete the keying of data. The Registrar has requested the use of Community Work Experience Program (CWEP) participants since 2006, but has been told that the program is unable to place any participants in her office, due to a funding shortage in the program. The Registrar has requested clerical assistance from other programs in the Division of Public Health, but these requests have not been responded to.

Field Note:

The data for 2006 and 2007 births has not been keyed into the Vital Statistics data files. The 2006 birth year has only had 36% of records keyed, and 2007 has not been started. The primary reason is a continuing lack of staff support for data entry, as well as a continuing lack of staff for the Office of Vital Statistics. In addition to the 40% vacancy rate the Office has had since 1999, they were given additional duties in January 2007 with no provisions made for additional funding or staff. These additional duties (marriage license applications) take up the time that had been used in the past for keying of data. During 2008, for short and sporadic periods, the Office has been able to garner some assistance from student helpers, but this assistance has not been consistent enough to complete the keying of data. The Registrar has requested the use of Community Work Experience Program (CWEP) participants since 2006, but has been told that the program is unable to place any participants in her office, due to a funding shortage in the program. The Registrar has requested clerical assistance from other programs in the Division of Public Health, but these requests have not been responded to.

FORM NOTES FOR FORM 21

For 2009 we are unable to obtain this data and the main reason for the delay in the this annual reporting year, the DPHSS Office of Vital Statistics (OVS) is because of a shortage of staff and the lack of equipment to do electronic reporting, OVS has not been able to publish a statistical report since 1997. DPHSS OVS is waiting to be using two programs, the State and Territorial Electronic Vital Event System (STEVE) and the Electronic Verification of Vital Events Nationwide System (EVVE). With STEVE, birth and death records can be copied electronically and paper certificates are printed, certified and issued immediately.

So the MCH program will be using the data of 2007 for both parts of A and B because of the 2009 data is unavailable for this reporting period.
